THE JOURNAL OF EXPERIMENTAL EDUCATION

ANNUAL INDEX
Volume 64
Fall 1995–Summer 1996

AUTHORS

Adams, Gerald J. Using a Cox Regression Model to Examine Voluntary Teacher Turnover, Spring, 267–285.

Beasley, T. Mark; and Schumacker, Randall E. Multiple Regression Approach to Analyzing Contingency Tables: Post Hoc and Planned Comparison Procedures, Fall, 79–93.

Bergin, David. Adolescents' Out-of-School Learning Strategies, Summer, 309–323.

Campbell, Kathleen T.; and Taylor, Dianne L. Canonical Correlation Analysis as a General Linear Model: A Heuristic Lesson for Teachers and Students, Winter, 157–171.

Fan, Xitao; and Wang, Lin. Comparability of Jackknife and Bootstrap Results: An Investigation for a Case of Canonical Correlation Analysis, Winter, 173–189.

Ferron, John; and Onghena, Patrick. The Power of Randomization Tests for Single-Case Phase Designs, Spring, 231–239.

Goh, Swee Chiew; Young, Deidra J.; and Fraser, Barry J. Psychosocial Climate and Student Outcomes in Elementary Mathematics Classrooms: A Multilevel Analysis, Fall, 29–40.

Griffin, Marlynn M.; and Griffin, Bryan W. Situated Cognition and Cognitive Style: Effects on Students' Learning as Measured by Conventional Tests and Performance Assessments, Summer, 293–308.

Johnson, William L.; Snyder, Karolyn J.; Anderson, Robert H.; and Johnson, Annabel M. School Work Culture and Productivity, Winter, 139–156.

Kromrey, Jeffrey D.; and Hines, Constance V. Estimating the Coefficient of Cross-Validity in Multiple Regression: A Comparison of Analytical and Empirical Methods, Spring, 240–266.

Lan, William Y. The Effects of Self-Monitoring on Students' Course Performance, Use of Learning Strategies, Attitude, Self-Judgment Ability, and Knowledge Representation, Winter, 101–115.

Lan, William W.; and Repman, Judi. The Effects of Social Learning Context and Modeling on Persistence and Dynamism in Academic Activities, Fall, 53–67.

Marsh, Herbert W.; and Hau, Kit-Tai. Assessing Goodness of Fit: Is Parsimony Always Desirable?, Summer, 364–390.

Martinez-Pons, Manuel. Test of a Model of Parental Inducement of Academic Self-Regulation, Spring, 213–227.

Nath, Leslie R.; Ross, Steven; and Smith, Lana. A Case Study of Implementing a Cooperative Learning Program in an Inner-City School, Winter, 117–136.

Perrine, Rose M.; Lisle, James; and Tucker, Debbie L. Effects of a Syllabus Offer of Help, Student Age, and Class Size on College Students' Willingness to Seek Support From Faculty, Fall, 41–52.

Rickard, Anthony. Teaching With Problem-Oriented Curricula: A Case Study of Middle-School Mathematics Instruction, Fall, 5–26.

Solomon, Daniel; Battistich, Victor; and Hom, Allen. Teacher Beliefs and Practices in Schools Serving Communities That Differ in Socioeconomic Level, Summer, 327–347.

Tuckman, Bruce. The Relative Effectiveness of Incentive Motivation and Prescribed Learning Strategy in Improving College Students' Course Performance, Spring, 197–210.

Zimmerman, Donald W. Increasing the Power of Nonparametric Tests by Detecting and Downweighting Outliers, Fall, 71–78.

Zimmerman, Donald W. A Note on Homogeneity of Variance of Scores and Ranks, Summer, 351–362.

TITLES

Adolescents' Out-of-School Learning Strategies. David A. Bergin, Summer, 309–323.

Assessing Goodness of Fit: Is Parsimony Always Desirable? Herbert W. Marsh and Kit-Tai Hau, Summer, 364–390.

Canonical Correlation Analysis as a General Linear Model: A Heuristic Lesson for Teachers and Students. Kathleen T. Campbell and Dianne L. Taylor, Winter, 157–172.

A Case Study of Implementing a Cooperative Learning Program in an Inner-City School. Leslie R. Nath, Steven Ross, and Lana Smith,

Winter, 117–136.
Comparability of Jackknife and Bootstrap Results: An Investigation for a Case of Canonical Correlation Analysis. Xitao Fan and Lin Wang, Winter, 173–189.
Effects of a Syllabus Offer of Help, Student Age, and Class Size on College Students' Willingness to Seek Support From Faculty. Rose M. Perrine, James Lisle, and Debbie L. Tucker, Fall, 41–52.
The Effects of Self-Monitoring on Students' Course Performance, Use of Learning Strategies, Attitude, Self-Judgment, Ability, and Knowledge Representation, Winter, 101–115.
The Effects of Social Learning Context and Modeling on Persistence and Dynamism in Academic Activities. William Y. Lan and Judi Repman, Fall, 53–67.
Estimating the Coefficient of Cross-Validity in Multiple Regression: A Comparison of Analytical and Empirical Methods. Jeffrey D. Kromrey and Constance V. Hines, Spring, 240–266.
Increasing the Power of Nonparametric Tests by Detecting and Downweighting Outliers. Donald W. Zimmerman, Fall, 71–78.
Multiple Regression Approach to Analyzing Contingency Tables: Post Hoc and Planned Comparison Procedures. T. Mark Beasley and Randall E. Schumacker, Fall, 79–93.
A Note on Homogeneity of Variance of Scores and Ranks. Donald W. Zimmerman, Summer, 351–362.
The Power of Randomization Tests for Single-Case Phase Designs. John Ferron and Patrick Onghena, Spring, 231–239.
Psychosocial Climate and Student Outcomes in Elementary Mathematics Classroom: A Multilevel Analysis. Swee Chiew Goh, Deidra J. Young, and Barry J. Fraser, Fall, 29–40.
The Relative Effectiveness of Incentive Motivation and Prescribed Learning Strategy in Improving College Students' Course Performance. Bruce W. Tuckman, Spring, 197–210.
School Work Culture and Productivity. William L. Johnson, Karolyn J. Snyder, Robert H. Anderson, and Annabel M. Johnson, Winter, 139–156.
Situated Cognition and Cognitive Style: Effects on Students' Learning as Measured by Conventional Tests and Performance Assessments. Marlynn M. Griffin and Bryan W. Griffin, Summer, 293–308.
Teacher Beliefs and Practices in Schools Serving Communities That Differ in Socioeconomic Level. Daniel Solomon, Victor Battistich, and Allen Hom, Summer, 327–347.
Teaching With Problem-Oriented Curricula: A Case Study of Middle-School Mathematics Instruction. Anthony Rickard, Fall, pp. 5–26.
Test of a Model of Parental Inducement of Academic Self-Regulation. Manuel Martinez-Pons, Spring, 213–227.
Using a Cox Regression Model to Examine Voluntary Teacher Turnover. Gerald J. Adams, Spring, 267–285.
